

FERNANDO PARMEZANI DOS REIS

Senior Full-Stack Engineer · .NET / Angular · Legacy Modernization · GovTech & Enterprise Systems

São Paulo, Brazil (Remote) · +55 11 96376-7799 · fparmezani@gmail.com · linkedin.com/in/fparmezani · github.com/fparmezani

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 20+ years delivering enterprise backend and frontend systems in ASP.NET Core, C#, Angular, and SQL Server. Demonstrated expertise in modernizing legacy .NET MVC applications to .NET 8 — maintaining full business-logic fidelity across complex, data-intensive enterprise platforms. Track record of delivering production-ready code in Agile/Scrum teams, integrating RESTful APIs, and engineering scalable SQL Server data layers for GovTech, HR, insurance, and B2B enterprise environments. Available for nearshore remote engagement aligned with U.S. business hours.

KEY COMPETENCIES

- .NET MVC → .NET 8 modernization: migrating legacy enterprise applications with zero business-logic regression
- ASP.NET Core backend services — REST APIs, Web API, dependency injection, middleware pipelines
- Angular 8+ frontend components integrated with .NET Core backend services
- SQL Server — complex stored procedures, views, triggers, query optimization for enterprise data layers
- Entity Framework Core and NHibernate — ORM design for high-volume transactional systems
- CI/CD pipelines: GitHub Actions and Azure DevOps with staged deployments and test gates
- Docker containerization and cloud deployments (AWS ECS, Azure)
- Agile/Scrum — sprint planning, cross-functional delivery, distributed team collaboration

TECHNICAL SKILLS

Backend: C#, .NET Core (.NET 6/7/8), ASP.NET Core Web API, ASP.NET MVC, Windows Services

Frontend: Angular 8+, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

Data: SQL Server, PostgreSQL, Entity Framework Core, NHibernate, stored procedures, views, triggers

Cloud & DevOps: AWS Lambda, Amazon ECS, Docker, GitHub Actions, Azure DevOps, Azure

Testing & Methods: Unit Testing, xUnit, Agile/Scrum, REST, CI/CD, code review

CAREER HIGHLIGHTS

- Modernized 20+ legacy .NET MVC modules to .NET Core at Avenue Code, maintaining zero functional regression across a complex enterprise codebase.
- Reduced invoice generation execution time by 90.7% (54s → 5s) by redesigning a multi-statement TVF into inline stored procedure logic — a direct example of .NET-era modernization impact.
- Built Angular 8+ enterprise portals integrated with .NET Core REST APIs at MAG Seguros, supporting a nationally regulated insurance platform serving thousands of users.

- Authored 50+ complex SQL Server stored procedures, views, and audit triggers for enterprise financial and HR reporting pipelines.
- Implemented CI/CD pipelines (GitHub Actions and Azure DevOps) enabling automated, zero-downtime deployments to production across all recent engagements.

PROFESSIONAL EXPERIENCE

Senior .NET Engineer | Vórtx (Capital Markets Fintech)

Jan 2026 – Present

Remote • Brazil

- Design and implement .NET 6 microservices with ASP.NET Core, deployed via Amazon ECS and Docker with full CI/CD automation through GitHub Actions.
- Build and maintain RESTful APIs consumed by financial-grade frontend applications, ensuring sub-100ms response times and high availability.
- Collaborate with engineering teams on PostgreSQL schema design, query optimization, and data migration strategies.

Stack: C# • .NET 6 • ASP.NET Core • REST APIs • AWS ECS • Docker • GitHub Actions • PostgreSQL

Senior Software Engineer | Avenue Code

Oct 2022 – Dec 2025

Remote • Brazil

- Led modernization of legacy ASP.NET MVC modules to .NET Core, executing incremental migrations with full unit test coverage and zero business-logic regression.
- Designed and delivered ASP.NET Core Web API services for B2B integrations, enabling real-time data exchange between enterprise shipper platforms.
- Authored 30+ SQL Server stored procedures, views, and triggers supporting business-critical reporting and transactional data pipelines.
- Built and maintained Windows Services processing high-volume event queues via AWS SQS/SNS, delivering fault-tolerant async workflows.
- Maintained Angular frontend components integrated with ASP.NET Core backends for internal operational portals.

Stack: C# • ASP.NET Core MVC • .NET Core • Angular • SQL Server • AWS Lambda • SQS • Unit Testing

Senior .NET Engineer | Tetris Consultoria — MAG Seguros (Insurance)

Oct 2020 – Oct 2022

Remote • Brazil

- Built Angular 8+ frontend widgets integrated with .NET Core REST APIs for an internal insurance management portal serving HR and compliance teams.
- Designed REST APIs for insurance benefit requests on a nationally regulated platform, applying OAuth security and Agile CI/CD practices.
- Managed Azure DevOps CI/CD pipelines with staged release gates for homologation and production environments.

Stack: C# • .NET Core • Angular 8+ • Azure DevOps • RESTful APIs • OAuth • SQL Server

Software Engineer | BASF

Apr 2019 – Oct 2020

Remote • Brazil

- Maintained and extended enterprise .NET applications for a global manufacturing company, delivering performance improvements and new feature modules on a fixed roadmap.
- Authored SQL Server stored procedures and views for financial and operational data reporting across multiple business units.

Stack: C# • .NET • ASP.NET MVC • SQL Server • Legacy Modernization

Tech Lead / Senior Developer | Pro Simulator

Jan 2016 – Mar 2018

Remote · Brazil

- Led the full development architecture — established standards, executed ASP.NET MVC to .NET Core migration, integrated Entity Framework ORM, and set up CI/CD processes.
- Mentored junior developers, conducted code reviews, and made key architectural decisions for a SaaS web product.

Stack: C# · ASP.NET MVC · .NET Core · Entity Framework · SQL Server · Bootstrap · Tech Lead

EARLIER EXPERIENCE

MicroPower (2018–2019) · Point Systems / SAP integration (2015–2016) · Atma IT (2014–2015) · DSC Consultoria (2012–2014) · Dotz (2012) · LabOne Systems (2011) · Redcube Technology (2010–2011) · Bitimage TI — Founder (2009–2010) · Nalco Brazil (2005–2009). Delivered CRM platforms, SAP WCF integrations, loyalty systems, and full-stack enterprise applications in C#, VB.NET, VB6, and ASP.NET. Multiple ASP Classic → ASP.NET and VB6 → C# migrations executed.

EDUCATION

Postgraduate — Artificial Intelligence Engineering · Anhanguera University · 2026 (Expected)

Bachelor's — Systems Analysis and Development · Impacta College · 2013

LANGUAGES

Portuguese — Native · **English** — Professional Working Proficiency

Available for nearshore remote engagement · Aligned with U.S. Eastern and Central time zones
